Full-stack software engineer with experience delivering business-critical, enterprise-scale web applications, currently working on Microsoft Office checkout and Copilot experiences. Strong background in React, .NET, and UX development, with a track record of owning features end-to-end in fast-moving teams.

EXPERIENCES

SOFTWARE ENGINEER | MICROSOFT | DUBLIN

February 2025 – Present

During my time with Microsoft, I have worked with two separate teams. Firstly, I was a member of a feature crew working towards the Copilot Prompt Gallery Rocksteady UX upgrade. After a company-wide restructuring, I joined OMEX and worked on the Office Checkout experience for embedded and website scenarios, where I worked on new user checkout experiences for both consumer and commercial users.

- Delivered end-to-end full-stack features across Microsoft Office checkout experiences using React (TypeScript), C# .NET, and Redux Toolkit, supporting both embedded and web purchase flows.
- Partnered closely with Product Managers and UX Designers to translate complex requirements into production-ready implementations across consumer and commercial scenarios.
- Owned and delivered business-critical initiatives including Dunning Protocol Launch and Market Expansion, proactively unblocking dependencies to meet delivery milestones.
- Implemented new telemetry and monitoring to clearly distinguish consumer and commercial checkout flows, improving observability and operational confidence in production.

SOFTWARE ENGINEER | ONLINE APPLICATION | DUBLIN

April 2024 – February 2025

As a full stack software engineer with Online Application, I was a key contributor to upgrading their mortgage application webapp. This included the UI and writing/redeveloping existing business logic and functionality.

- Designed and delivered a real-time mortgage application chat system enabling direct broker–client communication within the core product workflow.
- Built and shipped a custom life-quotation system end-to-end, generating and emailing PDF quotations to clients within a one-month delivery window.
- Contributed across the full stack using PHP/Laravel, InertiaJS, and Vue, modernizing UI and business logic within a legacy mortgage application.
- Collaborated effectively with a fully remote engineering team, maintaining clear documentation to support ongoing development and knowledge transfer.

FRONTEND ENGINEER INTERNSHIP | HOUGHTON MIFFLIN HARCOURT | DUBLIN

June 2023 – August 2023

Refactored the Teacher Dashboard on HMH Ed, increasing test coverage for new functionality from 0% to 90% and reducing main script size by approximately 35%. Supported deployment pipeline stability by collaborating with engineers to identify and resolve blockers, consistently applying best practices in testing and delivery.

- Frontend Engineer Internship as part of a full stack team, working on the HMH Ed application.
 - Wrote Unit and Integration tests for code coverage.
 - Used Jenkins + GitHub as part of deployment pipeline, including E2E testing and triaging.
 - Daily Standups and regular communication with team/other staff to coordinate and diagnose problems.
-

SKILLS

- **Core:** React, Vue, Typescript, C# .NET
- **Backend:** .NET, Laravel, PHP, SQL, Java

- **Cloud / DevOps:** AWS, Azure DevOps
 - **UX / Design:** Figma, UML
 - **Miscellaneous:** UX Research and Testing, Redux Toolkit, Material UI
-

EDUCATION

MSC ADVANCED SOFTWARE DEVELOPMENT | TECHNOLOGICAL UNIVERSITY DUBLIN

January 2024

- Relevant Coursework: Software Design, Programming Paradigms, Web Application Architectures, Advanced Databases, Secure Systems Development, Systems Architectures, UX Design, Data Visualization.
- Result: First-Class Honors.

CPD DIPLOMA FUNDAMENTALS OF COMPUTING | TECHNOLOGICAL UNIVERSITY DUBLIN

May 2022

- Relevant Coursework: Architecture, Operating Systems & Networks, Systems Analysis, Web & UI Design, Object Oriented Software Development.
- GPA: 91%.

BA GAME DESIGN | TECHNOLOGICAL UNIVERSITY DUBLIN

May 2021

- Relevant Coursework: Games Programming, Game Tools, Production, Game Engines, Prototyping.
 - Result: Upper Second-Class Honors
-

PROJECTS

RENTING MADE EASY | FRONTEND DEVELOPER AND UX DESIGN

October 2023 – December 2023

- Developed UI for Rental Listings website, focusing on usability and accessibility. Used tools such as Figma to design layouts and logos for the site, and to create prototypes for testing.
- AWS Cloud Architecture (Amplify, Cognito, S3, Lambda), and TanStack Query.
- Performed evaluations, including User evaluation, Expert Reviews, and manual testing.
- Fully Documented Approach to Development, available within [Final Report](#).
- [User Interface Demo](#).
- GitHub Repository: <https://github.com/oisintheginger/mscfinalproject>.

HMH ED TEACHER DASHBOARD REFACTOR AND NEW ERROR STATES | FRONTEND ENGINEER INTERN

August 2023

- Refactored large script into multiple Hooks and Components, while also creating test coverage for refactored behavior including unit/integration tests in Jest. Reduced lines of code by roughly 35%.
- Added new widget states to numerous widgets on the Teacher Dashboard of Ed, including error/empty states and toast alerts.
- Involved cross-team collaboration and back-and-forth from the UX team in Boston and in-house accessibility expert.
- [Ed Error States Demo](#).

PRESS REKORD | GAMEPLAY AND SYSTEMS PROGRAMMER

September 2020 – May 2021

- Developed Game Event System, Quest Systems, Dialogue Systems, Final Boss Encounter, and Fly Enemy AI.
- Used Scriptable Objects to construct dialogue trees for the game.
- The Game Event system allowed for decoupled communication between various game systems, e.g. quest system could listen for dialogue events to fire so that quests could progress.
- [Demo Video](#).
